Announcement to local/regional media

FOR IMMEDIATE RELEASE

Carver Community Electricity Aggregation Renewed until November 2028

Carver, MA – (Month xx, 2025): The Town of Carver announces the renewal of its Carver Community Electricity Aggregation (CEA) program, with new prices for the period November 2025 until November 2028. Carver CEA is a group purchasing program, operated by the Town since 2016, which provides electricity supply options to help residents and businesses manage costs and increase renewable energy use.

The Town is excited that it has secured lower prices for all supply options! Current participants do not need to take any action to remain in the Carver CEA program and receive the new pricing.

All new Carver CEA prices will be fixed for 36 months, beginning November 2025 until November 2028. The Carver CEA program will be served by our supplier, Constellation:

Carver Standard	Carver Plus
Old Price: 15.784¢/kWh New price: 14.346 ¢/kWh No additional renewable energy (63% in 2025)	Old Price: 17.372¢/kWh New Price: 15.475 ¢/kWh Adds renewable energy to total 100% (100% in 2025)
Our lowest priced option.	Go above and beyond! Put more renewables onto the grid than you consume.

Learn more about our options at MassCEA.com/Carver.

The majority of accounts in Town use the Carver Standard option. **You may switch to another Carver CEA option at any time. To switch options, call our program’s electricity supplier, Constellation, at (833) 461-0813, or submit a request at MassCEA.com/Carver.**

No action is necessary to receive the new pricing for your current Carver supply option. To check what Carver CEA supply option you currently use, you can review the Supply section of your Eversource electricity bill. If you participate in the program, your current supply rate will appear as one of the “Old Prices” of products listed in the table above.

New prices take effect on your November 2025 meter read. The first bill to show the new Carver CEA pricing will be the bill you receive showing usage from your November 2025 meter read to December 2025 meter read. Most customers can expect to receive this bill in December 2025.

The Town’s program launched in 2016, providing multiple contract terms of price stability. Most participants use the Carver Standard product, which has saved participants a total of \$6,700,000, or about \$1,930 for the typical residential customer since launch.
