Dighton Community Electricity Aggregation sets fixed rates to 2028

Beth McDermott Reporter assisted by AI

Sept. 24, 2025, 5:06 a.m. ET

Dighton has renewed its Community Electricity Aggregation program with new prices effective November 2025.

The program, which has been in place since 2016, aims to help residents and businesses manage electricity costs and increase the use of renewable energy. According to a community announcement, the new prices will be fixed for 36 months, running from November 2025 to November 2028.

The majority of accounts in Dighton use the Dighton Standard option. Participants can switch to another option at any time by contacting the program's electricity supplier, Constellation, at 833-461-0813 or by submitting a request at MassCEA.com/Dighton.

No action is required for current participants to receive the new pricing. To check which supply option they currently use, residents can review the Supply section of their National Grid electricity bill. The new prices will take effect on the November 2025 meter read, and the first bill reflecting the new rates will cover usage from the November to December meter read.
